

MATÍAS MAXIMILIANO SIONE

Full-Stack Developer | Next.js · TypeScript · Python · Supabase · AI Agents

Rosario, Santa Fe, Argentina | +54 9 341 259-3656 | sionematias@krownsoft.com.ar | linkedin.com/in/msione03 | github.com/Tariima | msione-portfolio.vercel.app

PROFESSIONAL SUMMARY

Full-stack developer with over a year building production software for real clients. I work at Solvant (systems and AI agents for SMBs) and Krownsoft (own products), and deliver freelance projects end to end: discovery, architecture, code, testing and deployment. Specialized in multi-tenant web platforms with Next.js/React and Supabase/PostgreSQL, Python/FastAPI APIs, mobile apps (Flutter, Expo) and automation with n8n, voice agents and WhatsApp. I am in the final semester of the University Technical Degree in Programming at UTN Rosario and will graduate in 2026.

PROFESSIONAL EXPERIENCE

Full-Stack Developer · Systems and AI Agents — Solvant

April 2026 – Present

Rosario, Argentina (remote)

- Lead author of a law firm's system: outbound dialer with an AI voice agent (Retell AI) and a WhatsApp collections bot, with a SQL cadence engine (weekly ramp-up, quotas, time windows, opt-out) and mandatory human takeover.
- Per-client modules in Solvant Platform (Next.js 15, React 19, Supabase): collections console with offer calculator and hand-off to an advisor, double-booking-proof agenda, dialer tweaks, WhatsApp line configuration and Chatwoot credentials.
- Frontend and data security for a multi-tenant platform serving a marketing agency with ~20 workspaces: Next.js 16 / React 19, co-branded client portal, cross-client RLS gap fixes and CI with Vitest and Playwright.
- Custom ERP for an aluminium-joinery manufacturer (Next.js 16, Supabase, Python): quoting-engine frontend, works module and E2E suite; CI with a pricing-engine calibration job. In production since September 2026.
- B2B WhatsApp sales agents wired into Odoo (n8n, OpenAI, Evolution API): workflows generated as code, an automated evaluation suite (DeepEval) with real side-effect tests on the ERP and dead-man-switch monitoring; integrations over API-less systems via RPA (Playwright, Scraping).

Full-Stack Developer — Krownsoft

July 2025 – Present

Rosario, Argentina (hybrid)

- TaskFlow, a real-time order and production management platform in production: FastAPI + PostgreSQL API with Alembic migrations, React 19 dashboard with live KPIs, Flutter app for operators, WebSockets fanning out to web and mobile, three-tier RBAC and exportable audit log.
- Infrastructure and CI/CD: GitHub Actions pipelines for staging and production, Docker Compose and Nginx on a VPS; SQLAlchemy deadlock fixes (joinedload + FOR UPDATE), overdue alerts with grace periods and bulk CSV import.
- ScoutPro (cross-platform sports scouting, Flutter + FastAPI): project structure and player persistence layer. F-Tracker: end-to-end two-factor authentication (TOTP).

Freelance Full-Stack Developer — Own products and direct clients

June 2026 – Present

Rosario, Argentina

- Nocta (own product): SaaS for ticket sales, bar orders and QR door control for nightclubs. Multi-tenant with deny-by-default RLS, per-venue Mercado Pago OAuth (money never passes through the platform), HMAC-signed QR codes, offline PWA validation, atomic anti-oversell stock reservation, Vitest tests and load testing.
- Patrol-traceability system for a private-security company: web (Next.js 16) + native Android app (Expo / React Native) with QR scanning, geofences, random-QR challenges, panic button with FCM push and three RLS-isolated roles.

IT Support (independent) and Customer Service (family business)

2018 – 2023

Rosario, Argentina

- Hardware and software diagnosis and repair, OS installation and configuration; in-person and phone customer service, cash control and operations records.

ACADEMIC AND PERSONAL PROJECTS

- Capstone project (UTN, 2026): gym and workout web platform with a .NET REST API and a React frontend; backend role in a team of three. Planned vs. performed routines, auto-confirmed bookings, Pro subscription, roles and 2FA.
- Python project collection (2024): scraping, voice assistant, a Pygame game and an OOP fleet-management system; TensorFlow modules (CNNs and NLP).

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES2023), Python, SQL, Dart, C# (.NET), HTML5, CSS3

Frontend: React 19, Next.js 15/16 (App Router, Server Components, Server Actions), Tailwind CSS 4, PWA, Recharts, Radix UI

Backend: Node.js, FastAPI, REST APIs, tRPC, WebSockets, idempotent webhooks, SQLAlchemy, Alembic

Mobile: Flutter, React Native (Expo, expo-router), EAS Build / Update, offline SQLite

Databases: PostgreSQL, Supabase (Row-Level Security, Auth, Storage, Edge Functions), Redis, MySQL, SQL migrations, Pandas

AI and automation: n8n (workflows as code), Retell AI, OpenAI API, DeepEval, Evolution API (WhatsApp), Chatwoot, Odoo (XML-RPC), RPA (Playwright, Scrapling)

DevOps and infrastructure: Docker, Nginx, GitHub Actions (staging/production CI/CD), Vercel, EasyPanel, Hostinger VPS, Cloudflare, Tailscale, Linux, Git

Security and quality: Multi-tenant architecture, Row-Level Security, AES-256-GCM, JWT, OAuth 2.0, TOTP 2FA, Vitest, pytest, Playwright, load and concurrency testing, ADRs, Conventional Commits

Integrations: Mercado Pago (OAuth, webhooks), Resend, Telegram, Meta / TikTok / YouTube OAuth, Zoho

EDUCATION

University Technical Degree in Programming (Tecnatura Universitaria en Programación) March 2025 – December 2026
(in progress, final semester)

Universidad Tecnológica Nacional (UTN), Facultad Regional Rosario
Capstone: gym and workout platform (.NET + React), backend role. Programming I–IV, Databases I–II, Systems Methodology I–II, Data Analysis, Software Development Management.

Information Systems Engineering (first year) 2022 – 2023

Universidad Tecnológica Nacional (UTN), Facultad Regional Rosario

Technician in Professional and Personal Computing (technical high school) 2015 – 2021

Colegio Salesiano San José, Rosario
Networks, hardware, programming and systems support.

COURSES AND CERTIFICATIONS

- Python TOTAL – Advanced Programmer in 16 Days — Udemy (Federico Garay), October 2024, 30.5 hours. Certificate UC-aeec9711-df95-40d4-b78c-25288b491f34.
- TensorFlow: Introduction, Convolutional Neural Networks and Natural Language Processing — course series, 2024.

LANGUAGES

Spanish: native. English: B2 (technical reading and fluent writing; English I and II passed at UTN).
